

**"Healthier People"**  
**STATE HOSPITALS - TOTAL**  
**Better Health Related Quality of Life (HRQOL)**

**HEALTH GAIN ACHIEVED**

for 6 months ending December 2004

STATE – TOTAL – AVERAGE SCORES PER INDIVIDUAL

	<b>On Admission</b>	<b>At Discharge</b>	<b>At 4 Months Post Discharge</b>	<b>Units of Health Gain Achieved<sup>1</sup></b>
<b>Physical Health</b>	35	30	46	11 = 1.1 standard deviation
<b>Mental Health</b>	44	45	50	6 = 0.6 standard deviation

**STATE HOSPITALS – TOTAL**  
**Better Health Related Quality of Life (HRQOL)**

**HEALTH LOSS AVOIDED**

for 6 months ending December 2004

STATE – TOTAL - AVERAGE SCORES PER INDIVIDUAL

	<b>On Admission</b>	<b>At Discharge</b>	<b>At 4 Months Post Discharge</b>	<b>Predicted Results <i>without</i> Hospitalisation</b>	<b>Units of Health Loss Avoided<sup>2</sup></b>
<b>Physical Health</b>					
<b>Mental Health</b>					

<sup>1</sup> This is calculated by subtracting the scores at 4 months post discharge from the scores on admission.

<sup>2</sup> This is calculated by subtracting the predicted health status scores *without* hospitalisation from the health status scores 4 months post discharge.
